

Harry Jerome Community Recreation Centre Project

A VIBRANT SOCIAL HEART OF OUR COMMUNITY

PROJECT UPDATE NOVEMBER 2023

Executive Summary

The New Harry Jerome Community Recreation Centre Project and Silver Harbour Seniors' Activity Centre (HJCRC/SH) continue to be the largest investment in community recreation in the city to date. When completed, it will provide more than 18,580 sq.m. of inclusive and accessible community space to support our community's physical, mental and social well-being. Construction continues and is focused on concrete works, backfill, construction mock-ups, and mechanical and electrical rough-in works.

The Pool Filtration System

The pool filtration system the new Harry Jerome Community Recreation Centre will include an innovative way of improving water and air quality in swimming pools. The new centre will use the inBlue© system that has been proven to be highly effective at reducing energy usage and water consumption by up to 50% and seeks to deliver the healthiest bathing water amongst available technologies.

- The inBlue© system utilizes a drum filter that operates by gravitation – no pump pressure needed. Particles are continuously filtered out, instead of being dissolved by chlorine and hot water in traditional filtration systems.
- The inBlue© system also includes a gas stripper that reduces respiratory discomfort by removing gaseous by-products of disinfection in pool water, such as trichloramine and trihalomethane,
