

Harry Jerome Community Recreation Centre Project

Executive Summary

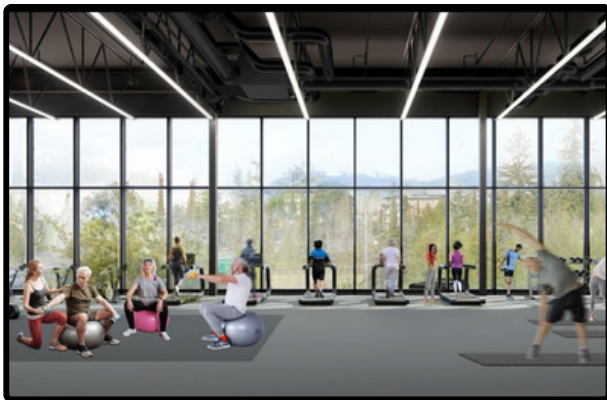

The Harry Jerome Community Recreation Centre and Silver Harbour Seniors' Activity Centre (HJCRC/SH) project represents the most extensive capital revitalization initiative ever undertaken by the City of North Vancouver. Following years of planning, consultation, design refinement, and community engagement, construction is nearing completion on what will be a state-of-the-art, inclusive community amenity hub. When completed, it will provide more than 18,580 m² of inclusive and accessible community space to support the physical, mental, and social well-being of our community, reflecting the City's vision of being the "Healthiest Small City in the World". Construction is currently focused on structural steel, mass timber elements, steel deck, masonry, mechanical and electrical work.

Highlight – Fitness Centre Facilities

The centre's new fitness area features nearly 1,000 m² of interior space, with large floor to ceiling windows offering inspiring views of the North Shore Mountains. Two dedicated studios overlook the aquatics centre, while over 450 m² of outdoor space provides a unique fresh-air fitness experience.

There will be access to state-of-the-art cardio and training equipment in the main fitness room, along with opportunities to join a variety of group classes, including yoga, dance, spin, and personal training.

The new fitness centre at the Harry Jerome Community Recreation Centre is designed to be an inclusive and connected space for anyone looking to enhance their wellness journey.
